# System Recovery

1. Environment requirement
   - MicroSD card (8GB capacity is recommend) and a SD card adapter.

2. Create a bootable MicroSD for Windows
   2.1 Download 'win32diskimager' from
   https://sourceforge.net/projects/win32diskimager/
   2.2 Download Matrix-700 image (filename: restore_ebx501-20190528.img)   from
   http://www.artila.com/download/OEM/image/EBX/
   2.3 Run 'win32diskimager' and select image file then press 'Write' button

3. **Insert bootable MicroSD to Matrix-700** then Power On
4. Execute restore command
   The 'restore' command to start the restore process, which will take around 10 minutes
   to compete. Your Matrix box computer will reboot automatically when the restore
   process is finished.
